NORTHBRIDGE HOSPITALS - CARDIOLOGY

SYNTHETIC SAMPLE REPORT - FICTIONAL PATIENT - NOT REAL PATIENT DATA

Patient: Grace Okafor (fictional)
Age: 52
NHS number: 999 012 3456 (test range)
Date of report: 21 Oct 2026
Referrer: Breast oncology, Northbridge Hospitals

Transthoracic echocardiogram.
Clinical indication: HER2-positive breast cancer on trastuzumab; 3-monthly cardiac surveillance.
Findings: Left ventricle normal in size. LVEF 54% (baseline 60%). Global longitudinal strain -18%. No regional wall motion abnormality. No pericardial effusion.
Conclusion: LVEF within normal limits with a modest fall from baseline. Continue trastuzumab.
Recommendation: Repeat echocardiogram in 12 weeks; this will be performed at Valeford Hospitals cardio-oncology service.

Reported by: Dr A. Example, Consultant Cardiologist (fictional)
