NORTHBRIDGE HOSPITALS - BREAST IMAGING

SYNTHETIC SAMPLE REPORT - FICTIONAL PATIENT - NOT REAL PATIENT DATA

Patient: Priya Chandran (fictional)
Age: 44
NHS number: 999 012 3458 (test range)
Date of report: 19 Oct 2026
Referrer: Symptomatic breast clinic, Northbridge Hospitals

Right breast ultrasound.
Clinical indication: Palpable lump, right breast.
Findings: 11 mm oval hypoechoic mass at 10 o'clock, 3 cm from the nipple, with partly indistinct margins. No abnormal axillary lymph nodes.
Impression: U3 - indeterminate.
Recommendation: Ultrasound-guided core biopsy is recommended.

Reported by: Dr C. Example, Consultant Breast Radiologist (fictional)
